

“ ... it reflects the talents of everyone involved, from the design firm to the custom home builder, and the Platinum team.”

Burnaby Residence

PLATINUM MILLWORK INC.

PERREAULT HOMES | PURITY DESIGNS

The scope of work of this stunning new three-story custom home included the following:

Main floor: kitchen cabinetry with two islands, banquette area, pantry, laundry room, powder room, dining room, and office built-ins. Upper floor: master ensuite, shared bath, and guest bedroom with Murphy Bed. Basement floor: wine room with feature ceiling, recreation-entertainment room, and a full basement suite.

We were asked to take on the custom closet contract and garage cabinetry about midway through the project as the client wanted the Platinum product throughout their home.

The overall timeline from the beginning of shop drawings to the final installation was six months. We chose to submit this project because it reflects the talents of everyone involved, from the design firm to the custom home builder, and of course, the Platinum team. We are proud of the quality architectural woodwork we produced and were pleased to leave our clients satisfied and delighted.

We were fortunate there were no significant challenges or obstacles during the manufacture and install of the project. Overall everything went smoothly, though we did have to change our set-up and simplify our process when building the closets, as this is not something we typically do.

The materials ranged from quarter cut Walnut in the wine room to custom shaded Rift White Oak in the kitchen, master ensuite, and dining room wine cabinet, all with a beautiful Polyurethane finish. We also manufactured and incorporated banquette seating in the kitchen, bottle holders of aluminum rod for the dining room wine display, LED lighting to showcase the wine, and beaded vanity drawers in the powder room.

Overall, another successful project for Team Platinum!
