PLATINUM MILLWORK INC.

WORKING WITH WOOD CUSTOM HOMES LTD.

SARAH GALLOP DESIGN INC.

Platinum Millwork worked closely with the Sarah Gallop Design and Working with Wood Custom Homes to create the architectural woodwork in this gorgeous three-story waterfront home. Beautiful painted cabinetry graces the kitchen on the main floor, accented by a large island with a walnut butcher block. The scope on this floor also included a walk-in pantry, den, guest bath and powder room vanities. The third floor had a laundry room, bathroom, and the Master Bedroom, which boasts Rift Cut White Oak beams in a vaulted ceiling, offsetting the bed's rich deep blue upholstered headboard with built in cabinetry. A large walk-in closet, made with rift cut white oak veneer, and finished with the same stain as the beam, completed the look. The basement featured an inviting wine storage and tasting room, home theatre, gym and powder room with stand-alone vanity. The project wrapped up with a carriage house at the back of the property where Platinum manufactured the kitchen cabinets, island, and bathroom vanity.

We chose this project to be featured in the Spring Benchmark because of the positive feedback received from everyone involved. Shop drawings to samples to final installation took a total of four months. The Platinum team thoroughly enjoyed fabricating all the pieces showcased in this home.

There were no significant challenges on the project, despite a wide variety of colours in polyurethane paints and the multi-step staining procedure on the Rift Cut White Oak solids and veneer. Though we dealt with the typical material delays and price increases of the pandemic, the overall execution was pretty seamless, and we managed to complete it on time while staying within the tendered quote.

VICTOR DE FAZIO

"The Platinum team thoroughly enjoyed fabricating all the pieces showcased in this home."
